SECTION A: READING (5 Marks)

I. Read the passage carefully and answer the questions that follow:

In our electronic age, new machines are arriving at such a great speed that it is difficult to keep track of them. Colour televisions, Computers, Fax machines, Telephone answering machines and all the other paraphernalia of instant communication are making it possible for Indians to be part of the future.

The hand held cellular telephone, that necessity of the successful urbanite has become popular even in rural India. A farmer can be seen lying on his string bed under the shade of a tree beside his tethered bullocks talking into his cellular telephone. Whom is he talking to? Perhaps he is enquiring about the crop prices from the grain market or he is making arrangements to hire a tractor. It cannot be ruled out that he has contacted a property dealer in the city about the sale of some fields as city boundaries extend towards the village.

The city is bursting with computer schools as a quarter of a million Indians are busy producing computer software, which is used around the world. The electronics industry is the youngest in India but it has the fastest growth – exporting a billion dollar worth of electronic goods abroad every year.

Fill in each of the blanks with one suitable word only. (10x 1/2 =5 Marks)
