GENERAL INSTRUCTIONS

- This paper consists of three sections.
 - Section A reading (5 marks)
 - Section B writing & Grammar (8 marks)
 - Section C Literature (7 marks)
- All sections are compulsory.
- Separate instructions are given for each section and question wherever necessary.
- Read the instructions carefully and follow them.

SECTION A – (READING) (5 marks)

I. Read the following passage carefully and answer the questions that follow: -

There is a myth that there is something magical about computers and those who run them. The legend has got about that computers are ‘electronic brains’ and that programmers are some sort of supermen. The facts are that computers are very stupid and the people who programme are normal human beings. Anyone who can count from 0 to 7 on his or her fingers and make eight can learn to be a programmer. The business is not difficult, just tricky.

It is very misleading to imagine that computers can ‘think’ like people. They cannot. They have no more a mind of their own than a lawn- mower. However, they make it possible for people to ‘bottle’ thought. You work out how to do a particular job or solve a problem, write a program and the computer will apply your thinking to that job or problem as long and as often as you like. In this sense computers are half alive because they perpetuate the thinking of their creators.

Now complete the following sentences:

(1 x 3 =3 marks)

- a) Computers cannot think like _____.
- b) Computers are like lawn- mowers because _____.
- c) Computers are called half alive as they _____.

Choose the correct option

(1 x2 = 2 marks)

- a) Computers, however, make one thing possible for people to _____.
 - (i) deep thought (ii) think like machine (iii) bottle thought (iv) just think
- b) Which of the following is the meaning of word ‘tricky’ here _____.
 - (i) useful (ii) clever (iii) intelligent (iv) cunning

SECTION-B (WRITING & GRAMMAR) (8 marks)
