**Section A - Reading**

**1. Read the following passage and answer the questions that follow: (1×5=5)**

Early humans did not live in houses the way we do today. Their homes were just shelters to protect them from animals, the sun and the rain. They either lived in caves or built shelters under trees. Early humans usually stayed in groups. They had to move from place to place in search of food. They hunted, fished or picked wild berries and fruits. They made rough and simple tools such as stone choppers and stone axes with sharp edges. They ate food raw until they learnt how to make a fire. For clothing, they wore the skins of animals or the bark of trees. Their lives slowly changed. They collected the seeds of wild plants growing on the hillside and

sowed them. They learnt to plough the land and plant fruit, vegetables and other crops. They became farmers and began to lead more settled lives.
