Penguins are a group of aquatic, flightless birds living mostly found in Antarctica. Penguins have dark and white feathers. They have flippers for movement in water. Most penguins feed on fish, squid and other forms of sea life caught while swimming underwater. They spend half of their life on land and half in the oceans. Emperor penguins are the largest living species and the blue or fairy penguins are the smallest species. Most of the penguin species live in large colonies. Penguins are not afraid of human beings.
