I. <u>Read the passage carefully and answer the questions:</u>   (1x5=5)
For many thousands of years pyramids were the largest structures on earth bigger than
any other kind of building. The word 'Pyramid' is from the Greek word 'Pyramis'. It describes
a man-made structure. The structure is made up of a base and three or four triangular sides.
The sides converge (meet) at one point at the top. The base of the pyramid can be any regular
shape. Some pyramids have a base of three sides(trilateral), and others have four sides
(quadrilateral), but some have a shape of any number of sides (a polygon). The most common
and the most famous are the square pyramids of Egypt.

   Pyramids are found in many parts of the world: in Nigeria, Sudan, Greece, Indonesia, Peru
and of course, Egypt. The Great Pyramid of Khufu in Egypt,was judged to be one of the Seven
Wonders of the Ancient World. It is the only Ancient Wonder that is left standing today.Khufu
