

03rd November 2024

SAMRIDDHI PSYCHOMETRIC ASSESSMENT FOR CAREER PATH SELECTION

The Board of Directors, Indian Schools Oman, through Samriddhi Center for Excellence in Learning and Teaching, an ISO VLE Platform to develop collaborative initiatives, offers Psychometric Assessment for the students of Class IX, X, XI & XII starting from 18th November 2024.

The Assessment is beneficial to students who are preparing to select their stream of studies or choosing a career. The students will receive a comprehensive report on their abilities and aptitudes along with recommended career options. The report will also have their aptitude score potential pertaining to verbal, numerical, perceptual, spatial and practical skills. Through this Assessment, students will also come to know the amount of stress and anxiety they are capable of handling. Therefore, it is imperative that they take decisions on their course of study with due consideration of their aptitude and abilities.

Psychometric Assessment comes as a precursor to Avenir, an annual event aimed at providing career guidance for students and equipping them with the 21st century skills. Avenir is primed to showcase future-ready careers and courses aligned with the dynamic education and job market. This year, Avenir is being organized by Indian School Maabela in the third week of November.

'The Samriddhi Psychometric Assessment for Career Path Selection' is absolutely **free of cost**. Students can register for the Assessment using the following link; registration will be open until 09th November 2024:
